PROJECTS

PET CARE WEBSITE

Jul `22 – sep`22

- Technology- **Html, CSS, JS , java.**
- I have created a website for pet care in which I have divided the people into two categories. First, those who want to hire someone to take care of their pet. .The second one who wants to do the job for caring that pet.

Book Shop

Feb `23 –Jul `23

- Technology- Java, Jsp, CSS.
- In which has 2 users, Admin(all control over to admin) ,User . user will sell their old book to this website and buy a new books after completing the registration and login page. Admin can add a new book to this website using their id and password.

Hospital management sysytem

Aug`23-Oct`23

- Technology- SpringMvc ,jsp,.
- It has 3 modules(Admin, Doctor, Patient), the patient can register himself and take an appointment with the doctor and the admin will select the doctor based on his disease and the medicine will be ordered directly which the doctor will give the prescription to the patient .
