PROJECTS

PET CARE WEBSITE

- Technology-**Html, CSS, JS , java.**
- Making a pet care website for caring a pet in which customer give the information about which type of pet I have and search a person available or caring his/her pet and for caring his/her pet they give money.

HOSPITAL MANAGEMENT SYSTEM

- Technology-**Java Html, CSS.**
- For making a front-end we use jsp page and creating navigation bar and giving authority for doing something.
- Applying backend for storing user data like appointment and other information that can fill and apply and use services of hospital.

ORGANIC SHOP

- Technology – **Java,Html,CSS.**
- In this project I was doing that we order an organicfood online having more organic food, products etc. using html and CSS I design a webpage of the website so that user will more attract towards the products.
